Antwerp Summer University - Study&Explore

Spend a happy summer in Flanders, Belgium

Antwerp Summer University

Antwerp Summer University is the sunny part of University of Antwerp offering intensive, short-term courses within the areas of excellence of University of Antwerp and its partners. Summer school topics range from arts over design sciences to health sciences. Target groups are different for each summer school and may consist of students, researchers and working professionals.

Short term, international courses

An intensive learning experience is guaranteed thanks to the presence of international speakers, the interdisciplinary and international composition of the classroom, the low student/staff ratio and an interactive and innovative set-up of courses. All programs are accredited ECTS-credits. To keep the minds fresh and to maximise interaction, a variety of fun and interesting social activities is organised during evenings and weekends.

Students, alumni and staff are invited to enjoy the existing offer and/or to develop with us the offer of the future.
